

At RB Wallace, we work closely with our clients and we believe this is crucial in achieving a successful outcome. We place a strong emphasis on safety, performance, quality, team work and a "hands-on" management approach to achieve client satisfaction. As a result, a large percentage of our works comes from repeat business and referrals. We are approached again and again by many of the same clients and we feel that this speaks for itself.

RB Wallace Ltd has been involved in the execution of many successful projects. We are a reputable company, known for carrying out quality work on time, and, within budget. Our success stems from the fact that we use traditional civil engineering methods combined with modern technological innovations.

RB Wallace Ltd provides technical assistance through all stages of the project management process from Concept, Planning, Design, and Budgeting through to Construction and Hand-Over Process. Going forward, we are fully committed to working with our clients and their professional teams to achieve optimal construction solutions and to deliver best value to the highest possible standards in safety, environment and quality.

Service Station Development and maintenance

RB Wallace has extensive experience with the construction and overhaul of petrol stations. We take care of all aspects of the process: project co-ordination, construction, maintenance and inspection of the entire station – the entire construction of the shop and the canopy right through to the underground tanks and pumps. Our efficient working method ensures short lead times. Needless to say, we are familiar with the applicable safety requirements and laws and regulations. Over the years, various oil companies have relied on our expertise for the construction of their petrol stations.

Decommissioning of Service Stations/ contaminated grounds

RB Wallace Ltd provides a comprehensive decommissioning service. This includes the De-gassing, labelling and cold

cutting of all types of tanks from the largest service station to the smallest private site, for both under and over-ground tanks.

Site Remediation Works

RB Wallace Ltd, have become specialists in remediation projects in Ireland. We are proficient in the development of conceptual models and remediation strategies. We have a clear understanding of implementing current legislation and waste management regulations and all operations are carried out by fully trained, highly experienced and skilled staff to the most stringent health and safety standards.
